SUBJECT INDEX

Adatom
Chemical shifts in XPS spectra of small metal islands supported on metal substrates: a semi-empirical treatment 97
AES
Charging and charge compensation in AES analysis of insulators 15
Application of computer programs to matrix corrections in the surface analysis of amorphous films 127
Methanol adsorption on single crystal NiO(100) studied by HREELS deconvolution 223
Amorphous film
Application of computer programs to matrix corrections in the surface analysis of amorphous films 127
Arsenic
XPS data for sputter-cleaned $In_{0.53}Ga_{0.47}As$, GaAs, and InAs surfaces R1
Arsenide
XPS data for sputter-cleaned $In_{0.53}Ga_{0.47}As$, GaAs, and InAs surfaces R1
Attenuation parameter
Application of computer programs to matrix corrections in the surface analysis of amorphous films 127
The role of the attenuation parameter in electron spectroscopy 275
Auger
On the calculation of final state free atom metal shifts of core levels 197

Barium
X-ray photoelectron studies of Ca, Sr and Ba and their oxides and carbonates 111
Barium compound
Dynamic dipolar relaxation in X-ray photoelectron spectra of the Ba4p subshell in barium compounds 211
BES
Chemical shifts in XPS spectra of small metal islands supported on metal substrates: a semi-empirical treatment 97
Butadiene
X-ray induced electron yield spectrum of thin films of 1,3-*trans*-butadiene and 1,3,5-*trans*-hexatriene 293
Butyl amine
Stability of CuO surfaces to reactions with adsorbed *n*-butyl amine: an X-ray photoelectron spectroscopy study 307

Calcium
X-ray photoelectron studies of Ca, Sr and Ba and their oxides and carbonates 111
Carbonate
X-ray photoelectron studies of Ca, Sr and Ba and their oxides and carbonates 111
Ceramic
Charging and charge compensation in AES analysis of insulators 15
Insulator surface analysis 73
Charge compensation
Charging and charge compensation in AES analysis of insulators 15
Study of insulators with high resolution electron energy loss spectroscopy 33
Charge transfer
A high resolution X-ray photoelectron spectroscopy and INDO/S-CI study of the core electron shake-up states in poly(methyl methacrylate) and related model molecules 161
Charging
Charging effects in X-ray photoelectron spectroscopy 1
Charging and charge compensation in AES analysis of insulators 15
Some physical descriptions of the charging effects of insulators under incident particle bombardment 49

Insulator surface analysis 73
Chemical shift
Chemical shifts in XPS spectra of small metal islands supported on metal substrates: a semi-empirical treatment 97
Copper oxide
Studies of the Cu–O bond in cupric oxide by X-ray photoelectron spectroscopy and ab initio electronic structure models 255
Stability of CuO surfaces to reactions with adsorbed *n*-butyl amine: an X-ray photoelectron study 307

DDF
The role of the attenuation parameter in electron spectroscopy 275
Deconvolution
Methanol adsorption on single crystal NiO(100) studied by HREELS deconvolution 223
Application of Tougaard background subtraction to Langmuir–Blodgett films 243
DFT
On the calculation of final state free atom metal shifts of core levels 197
Dynamic dipolar relaxation
Dynamic dipolar relaxation in X-ray photoelectron spectra of the Ba4p subshell in barium compounds 211

ESD
Charging and charge compensation in AES analysis of insulators 15
Escape depth
The role of the attenuation parameter in electron spectroscopy 275

Fitting
Background calculation for X-ray photoelectron spectra analysis 327
Flavonoid
X-ray photoelectron spectra (XPS) of flavonoid parent compounds 315

Gallium
XPS data for sputter-cleaned $In_{0.53}Ga_{0.47}As$, GaAs and InAs surfaces R1

HAM/3
X-ray photoelectron spectra (XPS) of flavonoid parent compounds 315
Hexatriene
X-ray induced electron yield spectrum of thin films of 1,3-*trans*-butadiene and 1,3,5-*trans*-hexatriene 293
HREELS
Study of insulators with high resolution electron energy loss spectroscopy 33
Methanol absorption on single crystal NiO(100) studied by HREELS deconvolution 223
Hyperconjugation
A high resolution X-ray photoelectron spectroscopy and INDO/S-CI study of the core electron shake-up states in poly(methyl methacrylate) and related model molecules 161

INDO/S-CI
A high resolution X-ray photoelectron spectroscopy and INDO/S-CI study of the core electron shake-up states in poly(methyl methacrylate) and related model molecules 161
Indium
XPS data for sputter-cleaned $In_{0.53}Ga_{0.47}Ga$, GaAs, and InAs surfaces R1
Inelastic background parameter
Background calculation for X-ray photoelectron spectra analysis 327
Insulator
Charging effects in X-ray photoelectron spectroscopy 1
Charging and charge compensation in AES analysis of insulators 15
Study of insulators with high resolution electron energy loss spectroscopy 33
Some physical descriptions of the charging effects of insulators under incident particle bombardment 49
Insulator surface analysis 73
ISEELS
X-ray induced electron yield spectrum of thin films of 1,3-*trans*-butadiene and 1,3,5-*trans*-hexatriene 293

Island
Chemical shifts in XPS spectra of small metal islands supported on metal substrates: a semi-empirical treatment 97

Langmuir–Blodgett film
Application of Tougaard background subtraction to Langmuir–Blodgett films 243

Matrix correction
Application of computer programs to matrix corrections in the surface analysis of amorphous films 127

MCSCF
X-ray induced electron yield spectrum of thin films of 1,3-*trans*-butadiene and 1,3,5-*trans*-hexatriene 293

Methanol
Methanol adsorption on single crystal NiO(100) studied by HREELS deconvolution 223

Model
On the calculation of final state free atom metal shifts of core levels 197
Studies of the Cu–O bond in cupric oxide by X-ray photoelectron spectroscopy and ab initio electronic structure models 255

Monte Carlo
The role of the attenuation parameter in electron spectroscopy 275

NEXAFS
X-ray induced electron yield spectrum of thin films of 1,3-*trans*-budadiene and 1,3,5-*trans*-hexatriene 293

Nickel oxide
Methanol adsorption on single crystal NiO(100) studied by HREELS deconvolution 223

Oxide
X-ray photoelectron studies of Ca, Sr and Ba and their oxides and carbonates 111

Particle bombardment
Some physical descriptions of the charging effects of insulators under incident particle bombardment 49

Polaron
Insulator surface analysis 73

Polyacetylene
X-ray induced electron yield spectrum of thin films of 1,3-*trans*-butadiene and 1,3,5-*trans*-hexatriene 293

Polymer
A high resolution X-ray photoelectron spectroscopy and INDO/S-CI study of the core electron shake-up states in poly(methyl methacrylate) and related model molecules 161

Poly(methyl methacrylate)
A high resolution X-ray photoelectron spectroscopy and INDO/S-CI study of the core electron shake-up states in poly(methyl methacrylate) and related model molecules 161

Program
Application of computer programs to matrix corrections in the surface analysis of amorphous films 127

Re-oxidation
Stability of CuO surfaces to reactions with adsorbed *n*-butyl amine: an X-ray photoelectron spectroscopy study 307

Relaxation
Chemical shifts in XPS spectra of small metal islands supported on metal substrates: a semi-empirical treatment 97
Insulator surface analysis 73

Sputter cleaning
XPS data for sputter-cleaned $In_{0.53}Ga_{0.47}As$, GaAs, and InAs surfaces R1

Strontium
X-ray photoelectron studies of Ca, Sr and Ba and their oxides and carbonates 111

Surface analysis
Insulator surface analysis 73

Surface excitation
Background calculation for X-ray photoelectron spectra analysis 327

Tougaard background substraction
Application of Tougaard background subtraction to Langmuir–Blodgett films 243
Trapping mechanism
Some physical descriptions of the charging effects of insulators under incident particle bombardment 49

XPS
Charging effects in X-ray photoelectron spectroscopy 1
Chemical shifts in XPS spectra of small metal islands supported on metal substrates: a semi-empirical treatment 97
X-ray photoelectron studies of Ca, Sr and Ba and their oxides and carbonates 111
Application of computer programs to matrix corrections in the surface analysis of amorphous films 127
A high resolution X-ray photoelectron spectroscopy and INDO/S-CI study of the core electron shake-up states in poly(methyl methacrylate) and related model molecules 161
On the calculation of final state free atom metal shifts of core levels 197
Dynamic dipolar relaxation in X-ray photoelectron spectra of the Ba4p subshell in barium compounds 211
Methanol adsorption on single crystal NiO(100) studied by HREELS deconvolution 223
Application of Tougaard background subtraction to Langmuir–Blodgett films 243
Studies of the Cu–O bond in cupric oxide by X-ray photoelectron spectroscopy and ab initio electronic structure models 255
Stability of CuO surfaces to reactions with adsorbed *n*-butyl amine: an X-ray photoelectron spectroscopy study 307
X-ray photoelectron spectra (XPS) of flavonoid parent compounds 315
Background calculation for X-ray photoelectron spectra analysis 327
XPS data for sputter-cleaned $In_{0.53}Ga_{0.47}As$, GaAs, and InAs surfaces R1
